

NETHERLANDS MARITIME UNIVERSITY COLLEGE (NMUC)

Company Profile

The maritime industry is the backbone of modern businesses and is responsible for transporting over 90 percent of world goods. Without maritime transport, the import and export of goods and merchandise on the scale necessary for the modern world would not be possible. With the growing efficiency of shipping as an economical mode of transport and increasing trade liberalization, seaborne trade continues to expand and prosper while employing millions of people worldwide on land and sea.

In response to the growing industry and rise in demand for human capital, Netherlands Maritime University College (NMUC) was established in 2011 to undertake maritime education, training, research, and consultancy activities. Located right at the heart of ASEAN and at the junction of bustling regional maritime industries, NMUC is strategically positioned to support national and regional competitiveness in the maritime, logistics as well as oil and gas industries through the offering of various accredited academic and training programs. Driven by our motto, “Excellence with a Purpose”, we strive to offer the students as well as industry people the right skills, ample knowledge, and valuable experience that are required for a successful maritime career.
